VETERAN SOLUTIONS LLC

Secure. Documented. Mission-Ready.

TEXAS STATE CLOUD COMPLIANCE

TX-RAMP Readiness for Cloud Vendors

Get your cloud product ready for Texas state certification, with every step documented.

WHO THIS IS FOR

- Cloud and SaaS vendors that sell, or want to sell, to Texas state agencies and public universities.
- Vendors with a provisional certification that need to reach full certification.
- Prime contractors that need a VetHUB subcontractor for security documentation and support.

WHAT THE STATE REQUIRES

- Agencies must confirm TX-RAMP certification before they sign or renew a cloud contract.
- **Level 1:** 117 security controls (nonconfidential or low-impact data). **Level 2:** 223 controls (confidential data, moderate or high impact).
- You submit an assessment questionnaire, an authorization boundary diagram, a data flow diagram and a completed Security Plan workbook.
- Certification lasts three years, with continuous monitoring. The state assessment has no fee; your cost is the preparation.

WHAT WE DO

1. **Scope and level:** Confirm whether your product is in scope, which level applies, and whether a FedRAMP or StateRAMP authorization shortens the path.
2. **Security Plan workbook:** Work through every control with your team and record status, responsibility and implementation details.
3. **Diagrams:** Draw the authorization boundary and data flow diagrams from how your system really works.
4. **Questionnaire:** Draft the answers for your review. You submit them in the state vendor portal.
5. **Gap list:** A plain-language list of what must be fixed, ordered by effort.
6. **Continuous monitoring:** A calendar and templates for the required reports, incident notices and significant-change notices.
7. **Handoff:** A checklist sign-off and a written record of exactly what was done.

FOR PRIME CONTRACTORS

- Texas solicitations of $100,000 or more can require a VetHUB subcontracting plan. As a certified VetHUB, we can be named in yours.
- A subcontractor that only services or supports a certified cloud product does not need its own TX-RAMP certification (1 TAC 477.5(b)(3)).

WHAT WE DO NOT DO

We prepare; the State of Texas certifies. We do not issue, promise or guarantee certification. Veteran Solutions, LLC is not affiliated with the Department of Information Resources or the Texas Cyber Command and does not give legal advice.

WHY VETERAN SOLUTIONS

VetHUB — Veteran Heroes United in Business

SBA — Service-Disabled Veteran-Owned Certified

- **Certified.** Texas VetHUB and SBA-certified Service-Disabled Veteran-Owned Small Business.
- **Owner-delivered.** The person you talk to does the work. CompTIA Security+.
- **We practice what we sell.** Our own domain runs DMARC p=reject, MTA-STS enforce and DNSSEC/DANE. You can verify it in minutes.
- **No lock-in.** You keep every document, in a form another provider can pick up.

HOW WE WORK

- Remote, across Texas. Work is scheduled evenings and weekends, Central Time.
- Written quote after a scoping conversation.
- Services and documents are in English; we also speak and communicate in Spanish.

PROGRAM NOTE

TX-RAMP administration moves from the Department of Information Resources to the Texas Cyber Command by December 31, 2026. We follow the rules as they change.
